Sun Orchard Opens New Miami Office

MIAMI—November 17, 2015 — Sun Orchard, a premier juice and beverage products producer, today is pleased to announce the opening of a new office in the heart of Miami's dynamic business district. As a major international gateway city, the selection of Miami as the locale for its new office reflects Sun Orchard's growing stature in the industry. Sun Orchard will be actively recruiting qualified candidates to fill many new positions in the office, which will be comprised of over 20 employees.

Located at One Biscayne Tower, the establishment of this new office increases Sun Orchard's connections in Florida where one of its major plants is located in Haines City. Sun Orchard's other major site is located in Tempe, Arizona, which, when combined with Haines City offers bi-coastal services and redundancy to accommodate Sun Orchard's growth, both in gallons produced and customers served.

Jean-Marc Rotsaert, Executive Chairman of Sun Orchard, said, "We are excited that the continued strong performance of Sun Orchard has necessitated a new office being established in Miami. Now with an office in a business center, Sun Orchard is well-positioned to further enhance its strong growth trajectory by delivering its highest-quality products to more customers. We look forward to continuing our expansion both geographically into new markets as well as on the product-side, with more complex and sophisticated citrus products and vegetable based offerings."

Steve Finn, SVP, Sales & Marketing of Sun Orchard, stated, "As a major travel destination with ports for cruise ships and a booming hotel industry, Miami is an ideal location to solidify our presence. In this cultural hub, Sun Orchard will have an excellent opportunity to further establish its high quality products to the high-end culinary and mixology scene."

The new Miami office will occupy over 7,000 square feet on the 23rd floor of One Biscayne Tower. With its roots in sustainability, Sun Orchard engaged broker Michael Wagner of Stein Posner Real Estate Services Inc. to present only environmentally friendly buildings. One Biscayne Tower not only has an excellent, central location but, as exhibited by its 9th consecutive year as an Energy Star-rated building, high environmental standards.

About Sun Orchard

Founded in 1984, Sun Orchard has leveraged its roots in citrus juices (orange, lemon, lime, grapefruit) to develop an expanding portfolio of standard and customized beverages and culinary ingredients. The Company's product portfolio consists of top quality, 100% natural, not-from-concentrate citrus juices, fruit ades, bar mixes, specialty smoothie bases, and other customizable mixology and culinary solutions. Sun Orchard is headquartered in Tempe, Arizona, and has a strategic bi-coastal production platform with facilities in Arizona and Florida. Learn more at www.SunOrchard.com
